

# FORMSPRINT

## *Made to Order for Manufacturing*

STAYING A STEP AHEAD of the competition means operating as efficiently as possible. **FormSprint** dynamic form integration provides the flexibility and control needed for efficient document handling in the manufacturing environment. Standard form templates available from ICS make converting pre-printed invoices, purchase orders, checks and other forms a breeze. Just by adding your company name and address, logo and other pertinent information, your forms will be ready for production print.

In addition to standard form templates, FormSprint can reformat shop packet worksheets, picking lists, packing lists and other forms without custom modifications to application programs. FormSprint allows you to adapt spool file data to your requirements and make your documents much more readable. Easily add bar codes, format labels, integrate faxing and e-mailing with FormSprint managing the process in the background while your users concentrate on their jobs.

Providing Real Solutions For Business

## FormSprint Feedback

*"I highly recommend FormSprint. We use it for all our forms. It provides flexibility for any changes required without the cost involved in changing pre-printed forms. We can remotely utilize it at our other location with ease of logo and address changes. For Disaster Recovery requirements, we don't have to store duplicate forms. The customer service is excellent. This is one of the best decisions I've made!"*

– Karen Campbell, Smiths Aerospace  
Electronics Systems

*"FormSprint is by far the best AS/400 package we have ever bought. I can't say enough about the product and support."*

– Amal Abassi, J. D' Addarrio & Co, Inc.
